- ◆ Jars can be filled with formalin, zinc formalin, Bouins, Alcohol, etc. & are available with or without click lids
- ◆ Biohazard Bags available with or without pockets & tear bags/Multiple sizes available
- ◆ Multiple sizes available, contact us for additional information and quote

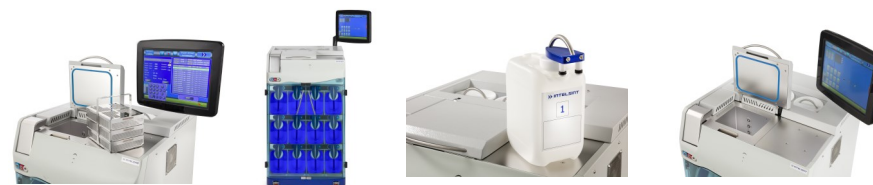

Intelsint EFTP PLUS Tissue Processor

Intelsint understands that reliability of a tissue processor is the backbone of every histology lab. Patient care stops when the tissue processor stops. This is doubly true when the tissue processor is a double retort. Building a highly reliable and durable tissue processor is not enough to ensure the security demanded by today's laboratory. Hence, we are introducing the EFTP PLUS at a price that enables a lab to purchase 2 processors for a lower cost than 1 double retort processor, thereby increasing redundancy, reliability, and lab workflow security.

Add in the following great features:

- ◆ Easy to use human-machine interface, makes training & operation simple
- ◆ 450 biopsies in 45 minutes (non-microwave) or traditional overnight run
- ◆ Xylene-free operation capable (non-microwave)
- ◆ 450 cassettes per run
- ◆ Auto fill & drain of reagents for reduced personnel exposure
- ◆ Back lite reagent bottles show when reagents need changed (optional)
- ◆ And many more features, contact us for information
- ◆ **\$67,500 for one processor, \$124,995 for two processors. LIMITED TIME OFFER!**
