Safety Design Line System Design Line Formalin Neutralizer

-Intended Use-

Design Line Formalin Neutralizer is an effective aldehyde neutralizer for aldehyde containing solutions such as formaldehyde and glutaraldehyde. It will neutralize solutions up to 4% w/v.

-General Information-

Design Line aldehyde neutralizing system is EPA validated for disposal of solutions containing formaldehyde and glutaraldehyde (up to 4% w/v). Design Line Formalin Neutralizer utilizes fast acting reagents that neutralize aldehydes quickly and effectively. Design Line Formalin Neutralizer's proprietary aldehyde reduction system achieves required pH levels through a novel approach of buffers and stabilizers, making an approved neutralize solution the first time, every time.

-Instructions for Use-

Instructions for use with aqueous 10% Neutral Buffered Formalin up to 4% w/v formaldehyde and/or solutions containing up to 4% w/v glutaraldehyde.

1. Collect waste in designated collection container.
2. When collecting waste, be sure to use a funnel with filtering device to remove tissue debris.
3. Add the entire contents of one Design Line Formalin Neutralizer bottle/pack to each gallon (128-fl.oz.) or 4 liters of aldehyde waste.
4. Secure lid on designated collection container and agitate container to thoroughly mix. **ENSURE THE ENTIRE AMMOUNT OF DESIGN LINE FORMALIN NEUTRALIZER HAS FULLY DISSOLVED.**
5. Allow the mixed solution to stand for 15-20 minutes to complete the neutralization process.
6. Test treated solution for any residual aldehyde content and proper pH levels prior to disposal.

7. Upon passing aldehyde content and pH test, the treated waste is now ready to be disposed down the drain. Consult with local and regional authorities to ensure complete and accurate classification of hazardous waste.

8. After disposal, rinse collection container with cold tap water to prepare for next use.

-Packaging-

Catalog No.	Volume
Optional	Design Line Starter Kit
	Contains:
	2.5 gal. Reaction Container
	Case of neutralizer 12 btl/case
	pH Test kit 100/pack
	Aldehyde Test Kit 100/pk
41-5302-00	Design Line Formalin Neutralizer Powder, 10 pks/Ca
Optional	Design Line Formalin Neutralizer Powder, 30 pks/Ca
Optional	Design Line Formalin Neutralizer Powder, 12 btl/Ca
Optional	Design Line 5 Gal. Neutralizing Packs
Required	2.5 Gal. Reaction Container, 1 Each
Required	Ph Test Kit, 100/pack
Required	Aldehyde Test Kit, 100/pack
